

Seth group would like to announce two RA openings. The specific projects are

1) "Stellar population mapping in the Andromeda galaxy", one year position starting any time appropriate for e.g. an 1st-2nd year student interested in trying something out. Start date, immediate. Desired (but not required) skills: programming (python, IDL), knowledge of stellar astrophysics and galaxy dynamics.

2) "Understanding the Formation of Galaxy Nuclei", full PhD thesis project. Start Date, Summer 2014. Desired skills: programming (python, IDL), knowledge of dynamics and extragalactic astronomy.

Interested students should contact Prof. Seth at aseth@astro.utah.edu.
