

Vardeny group expects several openings for graduate students to commence in the early Summer of 2014, provided that funds become available in May of 2014. The project directions are

1. "Optical Electrical and Magnetic properties of organic semiconductors for OPV solar cell applications", supported by DOE.
2. "Laser action in PT microcavities", supported by AFOSR.
3. "Organic Spintronics" supported by the NSF, or NSF-MRSEC.

Interested applicants should contact Prof. Vardeny at valy_vardeny@yahoo.com
